### **DETAILED ACTION**

1. Applicants' Preliminary Amendment, received 5 May 2005, is acknowledged. Claims 29-57 have been canceled.
2. Claims 1-28 and 58-61 are pending and under consideration.

### **Priority Statement**

3. A reference to the prior applications must be inserted as the first sentence(s) of the specification of this application or in an application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e), 120, 121, or 365(c). See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, 121, or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. There is no priority statement at the beginning of the specification claiming benefit of the prior documents.

### **Drawings**

4. Figure 4 is objected to because page 22, lines 7-11, of the specification, the description of Figure 4 refers to the figure in the singular, but there are two figures on the page listed as Figure 4.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the

Art Unit: 1645

several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### **Specification**

5. The disclosure is objected to because of the following informalities:

Page 15, line 29, "amide oe ester" should be "amide or ester".

Page 18, lines 16 and 28, "amide oe ester" should be "amide or ester".

Page 32, line 23, there is a long blank space in the text, please explain.

Page 42, line 13, please provide complete reference citation.

Page 50, line 24, please provide complete reference citation.

Appropriate correction is required.

### **Claim Rejections - 35 USC § 112**

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1645

7. Claims 1-28 and 58-61 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-9 and 24-28 recite a peptide or protein of the same "or substantially the same" sequence as a listed sequence. It is unclear what are the metes and bounds of what encompasses "substantial" sameness. The specification does not define the limits of "substantially the same". Therefore, it unclear what sequences can be included or excluded from the claimed peptides.

Claims 10-23 and 58-61 are dependent claims, but do not clarify the issue.

8. Claims 1-28 and 58-61 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-9 and 24-28 recite an amino acid sequence "represented by" a listed sequence. It is unclear what are the metes and bounds of what encompasses such "representation". The specification does not define the limits of "represented by". Therefore, it unclear what sequences can be included or excluded from the claimed peptides.

Claims 10-23 and 58-61 are dependent claims, but do not clarify the issue.

9. Claim 61 provides for the use of an antibody, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

#### **Claim Rejections - 35 USC § 101**

10. 35 U.S.C. 101 reads as follows:

Art Unit: 1645

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

11. Claims 15-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are drawn to "an antibody" against a peptide. The recitation of "diagnostic agent" or "medicament" lists only one component, the antibody. There is no recitation of isolation or purification. The peptides are natural products of *Clostridium* and as such, the antibodies are produced naturally in hosts infected by *Clostridium*, i.e., products of nature.

12. Claim 61 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).
